PRECAUTIONS FOR FASTENING

Because the texture of pillow fabrics varies so greatly, the adhesive-back fasteners stick to some pillow surfaces better than others. If the Topper's fasteners do not stick adequately to your pillow surface, we suggest you secure the hook side (sticky half) of the fasteners to the back of the pillow with a needle and thread.

When you remove a Topper from its pillow for cleaning, be careful to leave the hook side (sticky half) of the fasteners stuck to the pillow. Simply hold the sticky side of the fastener against the pillow with your thumb while you separate the two halves of the fasteners.

CENTER DESIGN ON TOPPER

Pillow Topper charts include a **red cross** to help you position the design properly on the Topper. Measure upward **precisely 2"** from the bottom tip of the fabric on the Topper (not from outside edge of fringe) and insert a pin to mark spot. The **red cross** on the chart corresponds exactly to the insertion point of your pin in the fabric.

START STITCHING

Count very carefully from the **red cross** to the upper left-hand corner of the chart and start your stitching there. Remove pin and continue stitching. Don't be alarmed if a few charted stitches do not fit at the edge of the stitching area on the Topper. Simply leave them out.
